Water Quality Monitoring of Northern Lake Washington Streams

January 2002

King County Water and Land Resources Division
201 South Jackson, Suite 600
Seattle, WA 98104
(206) 296-6519

ACKNOWLEDGEMENTS

Many individuals contributed their time and talents to this report. The following contributed significantly to its production.

Sample Collection and Analysis

Over the last twenty years, there have been numerous staff members involved in sample collection, laboratory analysis, quality assurance and data verifications, and data analysis. Most of these staff members worked through what is now the King County Environmental Laboratory.

Staff in the Environmental Services Section (ESS) provided field sampling and data collection services as well as provided overall coordination of the field projects.

Laboratory scientists analyze those samples in the trace metals, conventionals, microbiology, and aquatic toxicology laboratories. Lab staff members advise and assist King County project managers with laboratory and sampling procedures.

Data Analysis

Tom Georgianna, King County Statistician

Bob Brenner, King County Water Quality Planner

Technical Writing and Editing

Bob Brenner, King County Water Quality Planner

Debra Bouchard, King County Water Quality Planner

Jonathan Frodge, King County Water Quality Planner

Tom Ventur, King County Technical Information Processing Specialist
